

Sharon Laverty

**Technical Management Division Chief
Logistics Modernization Program (LMP)**

Ms. Sharon Laverty serves as the Chief of the Logistics Modernization Program (LMP) Technical Management Division (TMD). In this role, she oversees the Product Management Office's (PMO) three technical branches in the areas of cybersecurity, auditability, and infrastructure, which include technical architecture activities (hardware and software). She also manages coordination and communication of planning, performance, execution, and evaluation of ongoing infrastructure upgrade initiatives among partner and stakeholder organizations, including Communications-Electronics Command (CECOM) Army Shared Services Center (SSC), Defense Information Systems Agency (DISA), and Acquisition, Logistics and Technology Enterprise Systems and Services (ALTESS).

Prior to joining the LMP, Ms. Laverty served as an Information Assurance (IA) Manager for the Armament Research, Development and Engineering Center (Armament Research Development and Engineering Center (ARDEC) Headquarters (HQ)). Her responsibilities included supporting lifecycle activities for acquisition, operations, and software within SAP and strategic IA development for ARDEC across a broad spectrum of programs, including Enterprise Resource Planning (ERP) programs and weapons systems. From 2015-2017, she served as Branch Chief of Cybersecurity and Enterprise Data Warehouse Branch for the CECOM Army SSC where she also represented the organization for all cybersecurity and auditability projects and improvement plans. From 2017-2018, she served as Cybersecurity and Auditability Lead for the LMP PMO. Her responsibilities included performing cyber activities related to cost, schedule, and performance, and directly supporting the Product Manager and Deputy Product Manager.

Ms. Laverty earned her Bachelor's Degree in Business Administration from Centenary University and has earned several certifications in Information Technology. She also has successfully finished Leadership Training, Leading from the Start (Level I), Leading the Way (Level II), and Leading the Organization (Level III). Currently, Ms. Laverty is working toward a Master's Degree in System Engineering Management from the Naval Post Graduate School.
